

# INDEX

- 4K score, 612  
4Ts score, 399  
5-alpha reductase enzyme, 593–594  
5' nucleotidase, **334**, 335, 636  
6-mercaptopurine (6-MP), 138  
<sup>13</sup>C- and <sup>14</sup>C-labeled urea, 353  
15/15 rule, 208  
17-OHP, 578  
21-hydroxylase deficiency, 526  
<sup>99m</sup>Tc-sestamibi imaging, 165  
<sup>201</sup>Tl perfusion imaging, 165
- A**  
A1c. *See* Glycated hemoglobin (A1c)  
Abacavir, 468–469  
Absolute neutropenia, 387  
Absorbance optical system, 28  
Absorption, distribution, metabolism, and excretion (ADME), 136  
Accu Check Compact Plus, 200  
Accuracy, 3, 55, 59, 61  
Acetaminophen  
  nomogram for, 79  
  overview of, 106  
  serum concentration of, in poisoning (minicase), 80  
  toxicity from, 79  
Acetoacetate, 204, 206, 240  
Acetone, 204, 206  
Acid, defined, 303  
Acid-base chemistry  
  ABG assessments in, 307–308  
  anion gap in, 305  
  arterial bicarbonate in, 304  
  arterial blood gas interpretation and, 307  
  arterial oxygen saturation in, 305  
  arterial partial pressure of carbon dioxide in, 304  
  arterial partial pressure of oxygen in, 304  
  arterial pH in, 304  
  serum lactate in, 305  
  terminology in, 303  
  venous oxygen saturation in, 305  
  venous total carbon dioxide (serum bicarbonate) in, 305  
Acid-base disorders  
  classifications for, 307  
  determining respiratory versus metabolic, 307  
  metabolic acidosis, 308–309, **309**, 310.  
    *See also* Metabolic acidosis  
  metabolic alkalosis, 309, **310**. *See also* Metabolic alkalosis  
  respiratory acidosis, 310, **311**  
  respiratory alkalosis, 311, **311**  
Acid-base homeostasis, 270–271  
Acid-base homeostasis, regulation of, 306–307, 307  
Acid-base physiology, 306  
Acidemia, 303  
Acid-fast bacilli and stains, 470  
Acidosis. *See also* Metabolic acidosis  
  defined, 303  
  lactic, 308, **309**  
  respiratory, 310, **311**  
Activated clotting time (ACT), 408  
Activated partial thromboplastin time (aPTT), 406–408, **418**  
Activated protein (APC) resistance, 403  
Active metabolites, **99–100**, 106  
Acute blood loss anemia, **374**, 379  
Acute coronary syndrome (ACS), 152  
  electrocardiographic findings in, **154**, 154, 154–155  
  imaging studies and, 163–164  
  laboratory tests used in evaluation of, 155  
  biochemical cardiac markers, 155–160, **156**  
  minicase on, 155  
Acute hepatitis, 342, 343, 349  
Acute homeostasis, 271  
Acute kernicterus, 566  
Acute liver failure (minicase), 350  
Acute lymphoblastic leukemia (ALL), 387  
Acute myeloblastic leukemia (AML), 387  
Acute myocardial infarction (AMI), 152  
Acute pancreatitis, 352  
Acute pharyngitis, 479  
Acute phase reactants (proteins)  
  defined, 373  
  infection and, 484–485  
  in rheumatic diseases  
    juvenile idiopathic arthritis, 507  
    overview, 500–501  
  rheumatoid arthritis, 505  
  systemic lupus erythematosus, 509  
Acute phase response, 500  
Acute type B hepatitis (minicase), 349  
ADAM Questionnaire, 596  
Addison disease, 219  
Adenocarcinoma of lung  
  anaplastic lymphoma kinase, 526  
  EGFR and, 525  
Adenosine, 164  
Adenosine diphosphate (ADP), 394, 394  
*Adenoviridae*, **456**  
ADME (absorption, distribution, metabolism, and excretion), 136  
Adnexal tumors, hirsutism secondary to (minicase), 577  
Adolescents  
  categories of substances abused by, **70**  
  prerequisite drug testing of, 82–83  
Adrenal disorders, 218–219  
Adrenal glands, 218  
Adrenal insufficiency, 210  
ADVIA Centaur, 163  
Afatinib, EGFR and, 140–141, 143  
Affinity chromatography in measuring HgbA1c, 57  
Agar dilution, **430**, 432–433  
Agarose gel electrophoresis, 27  
Agar proportion method, 471  
Agars, 423, **425**  
Age-related differences. *See also* Hematology; Kidney function tests; Liver function tests; Pediatrics  
  in laboratory test results, 10–11, **11**  
  in total blood volume, 548–549, **549**  
Agglutination, 31–32, 32  
Aging Males' Symptom Scale, 596  
Agranulocytosis, 387  
*AHFS Drug Information*, 47  
Alanine aminotransferase (ALT)  
  as category of liver function tests, 330, **330**  
  omega-3 fatty acids and, 187  
  in pediatric patients, 565  
  Quickview Chart on, **366**  
  reference range for, in traditional and SI units, 636  
  statins and, 186

- Albumin  
 as category of liver function tests, 330, **330**  
 liver function testing and, 331  
 Quickview Chart on, **362**  
 reference range for, in traditional and SI units, 636  
 serum, in pediatric patients, 564–565  
 in urinalysis, 250
- Albumin-bound testosterone, 594, 598
- Albuminuria, 250
- Alcohol  
 driving under influence of, 70  
 HDL and, 179
- Aldosterone  
 potassium and effects of, 263, 269, 270, 272  
 sodium and effects of, 264–265
- Alkalemia, 303
- Alkaline phosphatase (ALP)  
 as category of liver function tests, 330, **330**  
 evaluation of elevated concentrations of, 334, **334**  
 liver function and, 334  
 nonhepatic causes of elevated, 334, **335**  
 in pediatric patients, 565  
 Quickview Chart on, **364**  
 reference range for, in traditional and SI units, 636
- Alkaline picrate assay, 240
- Alkalosis. *See also* Metabolic alkalosis  
 defined, 303  
 respiratory, 311, **311**
- ALK inhibitor, 141–142
- Alpha-fetoprotein (AFP), **518**, 523, **535**
- Alpha-glucosidase inhibitors, 224
- Altered serum binding, 104–106
- Altitude, laboratory test results and, 12
- Amenorrhea  
 defined, 572  
 differential diagnosis of, **574**  
 estrogen status and, 577  
 functional, 573–574  
 hyperandrogenism and, 576–577  
 hyperprolactinemia and, 573  
 hypothyroidism and, 573, **574**  
 ovarian failure and, 574–576  
 physical examination findings associated with, 572–573, **573**  
 polycystic ovary syndrome and, 576, **576**, **577**  
 primary and secondary, 572  
 symptoms associated with, 572, **572**  
 uterine outflow obstruction and, 573
- American Association of Clinical Endocrinologists (AACE), guideline on LDL, 182
- American College of Cardiology/  
 American Heart Association (ACC/  
 AHA)  
 Guideline on Treatment of Blood Cholesterol, 179, 182  
 Guidelines for Assessment of Cardiovascular Risk in Asymptomatic Adults, 185  
 guidelines for C-reactive protein measurement, 501  
 lipid guidelines, 208

- Amikacin, **99**
- Amino acid chains, 493–494, *494*
- Aminoglycosides, 112–113
- Aminophylline, 106–107
- Aminotransferases, 330, 338–339
- Amiodarone, 118
- Amitriptyline, 122–123
- Ammonia  
 hepatic encephalopathy and, 339–340  
 Quickview Chart on, **368**  
 reference range for, in traditional and SI units, 636
- Ammonium sulfate precipitation assay, 599
- AmpC beta-lactamases, 436
- Amperometry, 200
- Amphetamine  
 Quickview Chart on urine drug screen for, **88**  
 reliability of drug screening (minicase), 72
- Amphotericin B, 271
- AmpliChip® microarray, 143
- Amylase, pancreatitis and, 351–352
- Amylin  
 analog of, 226  
 effect of, on glucose concentrations, 193–194  
 levels of, 195–196
- Anaerobic bacteria, susceptibility testing of, 438–439
- Analgesic/anti-inflammatory drugs, **244**. *See also* Acetaminophen
- Analytes, 3–4, 52
- Analytical reliability, 144
- Analytic specificity (interference), 56. *See also* Drug interferences
- Anaplastic lymphoma kinase (ALK), **519**, 526, **543**
- Anaplastic lymphoma kinase (ALK) inhibitor, 141–142
- Androgen deficiency in aging males (ADAM), 594–595, **595**
- Androgen Deficiency in Aging Males (ADAM) questionnaire, 596
- Andropause, 594–595, **595**
- Androstenedione, 593
- Anelloviridae*, **456**
- Anemia(s)  
 acute blood loss, **374**, 379  
 aplastic, 387  
 causes of, 57, 373  
 of chronic disease, **374**, 379, 381  
 drug-induced hemolytic, 380, **380**  
 erythrocyte morphology for differential diagnosis of, 373, 374  
 glucose-6-phosphate dehydrogenase, 11, 380  
 hemolytic, **374**, 379–380  
 hereditary, 11  
 with increased MCV (minicase), 375  
 iron deficiency and, 377–379  
 iron stores and (minicase), 378  
 laboratory assessment of, 373–381  
 low platelet count and (minicase), 379  
 lymphopenia and (minicase), 386  
 macrocytic, 373, 375–377  
 macrocytic, megaloblastic, 376  
 microcytic, 377–379  
 myeloblast crisis (minicase), 382  
 myelodysplastic, 387  
 normochromic, normocytic, 379–381  
 overview of, 373  
 in pediatric patients, 567  
 pernicious, 376  
 physiologic, of infancy, 568  
 rheumatologic diseases and, 503  
 juvenile idiopathic arthritis, 507  
 rheumatoid arthritis, 506  
 systemic lupus erythematosus, 509  
 sickle cell, 11, 381  
 signs and symptoms of, 373  
 typical laboratory findings for types of, **374**
- Angiocardigraphy, 165
- Angiotensin II, 264
- Angiotensinogen, 264
- Angiotension-converting enzyme (ACE) inhibitors, 209
- Angiotension receptor blockers (ARBs), 209
- Anion gap, 305
- Anion gap acidosis, 308, **309**
- Anisocytosis, 371, 372
